## Announcing Our new Wiring Guide #17.

**Our new Wiring Guide features expanded coverage of our existing and new products.**

Wiring Guide 17 shows many applications of our products. This includes coverage for operators using any kind of track power. Diagrams from basic wiring to very complex wiring are included.

Basic diagrams for Two Aspect and Three Aspect Signaling only to diagrams for Two and Three Aspect Signaling and Automation. Many types of automation, including reverse loops for two rail operators and DCC operators to multiple types of automatic back-n-forth without switches to those with switches. Automatic train following train and protected crossings of main lines to trolley tracks.

Wiring Guide #17 consists of over 50 pages, and costs \$5.00. For delivery via U.S. mail, add \$2.00. Outside U.S. please add additional postage. U.S. funds only - no stamps!

Don't forget our full line Catalog for a full description of the items used in the Model RailRoad Wiring Guide, which is \$4.00. For U.S. mail delivery, add \$2.50. Both are offered @ \$12.50 (includes U.S. p/h) or free

via the internet. Don't forget, You can find us on the internet at [www.dallee.com](http://www.dallee.com).
