

Announcing.....

New signaling detection component and updated signaling components. Plus lower prices!

From your **D_E** DEALER or DIRECT!

Our line of current detection systems has been updated and includes a new component, the Trak-DTT2. This unit incorporates a latch with a timer to create a unique device. One of it's many applications is creating a station stop without any other components (except, as with all of our detection systems, for the 12 volt supply required to power the units).

The entire line features:

- Electrically isolated input.
- Electrically isolated output.
- DPDT 5 ampere relay output for nearly any type load.
- detects AC, DC, DCC, and other types of current flow.
- Flawless operation.
- Built in the U.S.A.

standard detector	Trak-DT	\$27.95*
with time functions	Trak-DTT	\$34.95*
with time and latch functions	Trak-DTT2	\$34.95*
with a Latch function	Trak-DTL	\$34.95*
regulated 12 volt DC supply	12VPS	\$17.95*

* all orders require PA State sales tax if applicable and a shipping / insurance charge (typically \$9.00). Call for total pricing.
