## New BEACON Light for all operators!

Item #557

\$19.95

BEACON Light footprint of 0.84" x 1.65"

LED can be removed to mount in a different location than the main board.

The electronic circuitry of the BEACON Light produces a high intensity BEACON effect utilizing an ultra-bright RED LED. The BEACON is usable on top of water tanks, towers, bridges, and wherever the effect is desired.

The BEACON is designed to operate from track or battery power. For stationary operation of the BEACON light, a 9 volt battery or fixed voltage AC, DC, DCC or other may be used. The BEACON consumes only a few milliamps to operate.

The BEACON light unit will accept any type of input voltage up to 20 volts AC, 26 volts DC.

The BEACON is furnished with double sided mounting tape and includes a 9 volt battery snap connector. If an on/off switch is desired, item #524 does the job.

plus applicable PA sales tax, shipping & handling. See our web site for current price schedule / ordering form.

Items available direct or through qualified dealers.

\* all orders require PA State sales tax if applicable and a shipping / handling / insurance charge (typically \$9.25).
