

## New "Plug-N-Play" connector sets for Dallee Sound in AristoCraft "G" locomotives!

It's now possible to add a Dallee Sound System to any AristoCraft engine that is equipped with connectors on their main board (mother board) without having to do any soldering!

These prewired harnesses come in two different versions. One for the older AristoCraft engines with two mother board connectors, item 998, and the other for the AristoCraft engines with three mother board connectors, item 993.

The cost is:

Item 998 - \$20.00

Item 993 - \$25.00

In addition to those prewired harnesses, we also have connectors with wires for their mother boards. Item 999 contains one two pin cable and one three pin (with two wires), for their speaker connector. This item retails for \$7.00.

Standard shipping/handling charges apply.

Ordering information, under "Price Schedule", as well as more information, wiring instructions for these items and much more can be found on our web site at [www.dallee.com](http://www.dallee.com).

We sell direct and to qualified dealers.
