

New P.C.C. Sound

Photo courtesy of AristoCraft trains

Our prototypically correct Dallee PCC Sound is now available and ready to ship. The sounds featured in our system are: Bell, Horn, Door Operation sounds and Wheel on Rail sounds, each of these affects can be individually selected for integration into your operation. If desired, the horn can be manually operated. The bell will ring twice when the PCC begins to move as a warning for the passengers. With the door operation sounds integrated in your operation you will hear the doors close as the trolley pulls out from the station and then open shortly after making your next stop. You will hear the wheels 'clicking' over the rail joints at a varying rate based on motor voltage or you can choose for it will be as though you are operating on welded rail. Our PCC Sound System is available for two different era's, "Air-Electric" and post WWII "All-Electric". The "Air-Electric" feature air compressor sounds with air operated doors. These systems are available for all types of operators; as with our other sound systems, this includes DC, DCC, AC, Auto-Horn type "G", Radio Receivers, Stationary, and other applications.

While the pricing for the 'early' and 'late' versions is the same, the pricing for the different types of operation is: DC, DCC, Radio and Stationary Item #636 and 637 is \$119.95*. Auto Horn operated via reed switch and magnet commonly used by "G" operators, item #986 and 987 is \$119.95*. AC utilizing conventional Whistle/Bell activation item #1086 and 1087 is \$129.95*. An 8 ohm speaker is also required for a complete installation. High efficiency speakers for all applications, as well as more details can be found in our upcoming new catalog or on our web site.

Item 636, 637 and Item 986, 987 shown above.

Sound Card measures 2.7"l x 0.95"w x 0.75"h

All items:
Made in U.S.A.

Item 1086 & 1087, shown above, is for conventional AC track power users with standard Horn/Bell operation.
