

New RL-LED lighting board

Now you can illuminate your cars or other items with the color temperature desired utilizing our super bright, regulated, LED lighting strip!

The RL-LED boards are 1/2" x 10" long and contain 4 super bright LED's positioned to create uniform lighting throughout its length. The RL-LED contains regulated variable intensity adjustment from a minimum brightness to full brightness. The power section is located on one end of the board thus allowing for the LED sections to be broken off and moved from the straight strip thus accommodating various size installations such as cabooses (most will only need 1 LED). The sections can be connected with wires or utilize item #757 connectors. The RL-LED is secured with double sided tape (item 388).

The LED's are less than 0.1" in height and have a 120 degree viewing angle thus allowing for illumination in all directions. The typical light output is 18 lumens per LED! They are blinding to the naked eye and really can't be viewed directly - unless you want to see spots before your eyes!

The RL-LED board is available in two versions. Item #2379 - Warm White to match a filament bulb for older cars and Item #2380 - Cool White, which is similar to florescent lighting found in modern cars.

Introductory pricing for the RL-LED's, either version, are \$29.95*:

Item #2379, Warm White or Item #2380, Cool White

Ordering information is on our web site as well - www.dallee.com.

All email should be directed to "info@dallee.com". Please don't forget to put a subject title into the subject line, otherwise your email will be deleted as SPAM. Also, when sending email to us, don't forget to let your ISP know that you are expecting email from us so that we are allowed to respond to your inquiry.

We sell direct and to qualified dealers.

*all orders require a minimum \$11 s/h charge.
