

New British Steam Sound from the Welshpool & Llanfair (W&LLLR).

The featured whistle is actually a Great Western bit of hardware, so the sound would be suited to many other British locomotives as well as many other types. The whistle is a high pitched single chime which could also be found on many smaller American locomotives. There are no air pumps present in this locomotive, so the sound system does not have any as well. Other sounds produced are a bell, blowers, safety valve, exhaust chuff (automatic or optionally synchronized), and cylinder blow down (requires operation via receivers or LocoMatic™ controller to activate).

Our W&LLLR Sound System is available for all types of operators. As with our other sound systems, this includes the DC, DCC, AC, Auto-Whistle type "G" operators, Radio, Stationary, and others. Pricing for the different systems is as follows: DC, DCC, Radio, Stationary: Item #707, \$119.95*. Auto Whistle "G" operators: Item #907, \$119.95*. AC operators utilizing conventional Whistle / Bell activation: Item #1007, \$129.95* An 8 ohm speaker is required. High efficiency speakers for all applications, as well as more details can be found in our catalog or web site.

Item 707 and Item 907 shown above.

Sound Card measures 2.7"l x 0.95"w x 0.75"h

All items:
Made in U.S.A.

Item 1007, shown above, is for conventional AC track power users with standard Whistle/Bell operation.

Ordering information, under "Price Schedule", as well as more information, wiring instructions for these systems and much more can be found on our web site at www.dallee.com.
