

New Large Speaker!

Normally we don't do press releases for this type of item but we were so impressed by not only it's high decibel output but by it's wide frequency response, especially the bass end of things, that we just had to let others in the "G" and "O" operators know about it's existence.

Item 217 has a large oval cone, with outside dimensions of 6" x 2.2" wide and 2" depth. This lends itself to the larger operators but is well needed and usable in that market. It boasts a high audio output of 95 db with a wide frequency response: 30Hz - 20kHz! Item 217 also accepts 13 watts of audio power and is rated as 8 ohms. It works extremely well with our 22 watt amplifier, item 672. While this speaker operates with all of our sound systems, it is ideal for use with our EMD type sound systems since the prime mover rumbles at the low frequencies of this speakers capabilities. Thus it makes them sound much more prevalant than with any other speaker. Nearly earth shaking for sure!

Item 217 is priced at \$19.95. Full details can be found in our latest catalog, #56, or on our web site. Our web site also has installation instructions for properly mounting this speaker in an AristoCraft SD45.

Ordering information, under "Price Schedule", as well as more information, wiring instructions for these systems and much more can be found on our web site at www.dallee.com.

We sell direct and to qualified dealers.
