

New Timer's

When you have the need to turn things on and off automatically all of the time you need the TIMER. Many possibilities exist for this device. We started to offer this type of item due to customer requests!

TIMER-1

Oscillating on / off Timer

Item # 505

The TIMER-1 provides an on/off power sequence of items with equal durations of time. The time can be set from approximately 1 to 90 seconds. You can either have the item that you want to turn on and off start in the "ON" state or "OFF" state. Besides using it as a simple on/off switch, it is also possible to operate a DC switch motor which could be used to operate motion items on your layout. Other time ranges are available on special order. Seperate power of 14-18 volts is required. The relay output can handle up to 5 amperes.

TIMER-2

Dual Oscillating on / off Timer

Item # 506

The TIMER-2 provides two independent timers on one board. TIMER-2 provides two on/off power sequence of items with equal durations of time. The time for each timer can be set from approximately 1 to 90 seconds. You can either have the item that you want to turn on and off start in the "ON" state or "OFF" state. Besides using it as a simple on/off switch, it is also possible to operate a DC switch motor which could be used to operate motion items on your layout. Since the TIMER-2 contains two independent timers and output's you can do different events with each of them. Other time ranges are available on special order. Seperate power of 14-18 volts is required. The relay output can handle up to 5 amperes.

Pricing for the TIMER-1, Item #505, \$39.95*, TIMER-2, Item #506, \$54.95.
