

The "Yard Master II"

photo by Dallas Gutacker © 2019

- Direct response with fixed momentum delay
- 2.5 Amps DC output power
- Green POWER indicator
- Center off direction control switch
- Electronic overload protection with auto-reset and Red LED Overload indicator
- Easily operated with 1 hand
- measures: 4.4"l x 2.4"w x 1.2"d
- 9+ foot of wire attached
- requires AC input power
- Made in U.S.A.

See web site for more details.

Yard Master II item #2354

\$149^{95*}

Yard Master II item #2355 with remote control option

\$169^{95*}

Remote control option allows for remote on/off (switch) control from 0 to speed set and back with momentum acceleration/deceleration. For example, this allows for a Trak-DTT2 to perform station stops, for DC trains, with momentum automation, back-n-forth with station stops at the ends and between, with additional components, and many other types of automation to be accomplished.

Item #690, #692 are suggested AC power transformers. The top end speed is set by the input voltage. The input transformer needs to be capable of delivering more or equal to the rated Yard Master's output current.

Ordering information, under "Price Schedule", as well as more information, wiring instructions for these items and much more can be found on our web site at www.dallee.com. Just type the item number into the search box in the upper right or click on "Throttle" in the "Categories" listing.

We sell direct and to qualified dealers.

All email should be directed to "info@dallee.com".

*requires a minimum s/h of \$15 within the U.S.A., see our price schedule for shipping details.
